B7 sofa

by B-Brand

B7 sofa

by B-Brand

B7 is a modular seating element with an atypical square footprint constructed from a pure geometric stacking. Stripped of any ornamentation, this furniture invites to sit, work, lay down and hang in different settings, both business and residential.

B7 is conceived as a stacking of volumes. The seating elements consist out of a round base made of black lacquered multiply with an upholstered seat. The seat and the back rest are connected through a low, recessed, black lacquered multiply volume that creates a shadow gap.

The upholstered back rest lends itself as a seat or work surface whether or not completed with a removable tray.

Connecting sofa elements and/or extension elements

The sofa elements can be used freestanding or can be attached to an other sofa element, in which case the separate connecting kit (see 4.3.) is required.

The rectangular 47.24" x 17.72" extension pouf can not be used freestanding. It has to be connected to another element.

All extension elements include the connectors to connect them to a sofa element.

Connecting 3 or more powered sofa elements 47.24" x 47.24" on request.

Foam & upholstery

The foam of the seating elements is combustion modified polyurethane, complying to BS 5852: Part 2:1982 (Schedule 1: Part 1) and Crib 5.

The seating elements are upholstered with fabric Encircle by Kvadrat. All colorways are possible.

The cushion is upholstered with fabric Vidar4 by Kvadrat in the color black, to complement the black base and the shadow gap between the back rest and the seat.

Base

The sofa elements have a round base, diam. 47.24" on adjustable feet

The rectangular and square poufs have a round base, diam. 13.78", on adjustable feet

The bases are made out of black lacquered multiply.

Electrification

The sofa elements 47.24" x 47.24" can be equipped with a power outlet in the seat and/or a wireless charger in the back rest

The round power outlet diam. 3.15" has 1 power and 1 USB-C and is placed in the front and/or in the back of the seat.

The unit in the top of the back rest is equipped with a wireless charger and 2 x USB-C.

Each freestanding sofa element with electrification is powered by only 1 mains lead 118" long (included).

Each combination of 2 powered sofa elements is powered by only 1 mains lead (included).

Exemption: a combination of 2 sofa elements each with 1 round power unit, is powered by 2 mains leads 118" long (included)

DAN is in essence a modular collection. The construction is based on traditional Japanese joinery.

It exists out of solid ash wood ladders and beams, and metal connecting parts.

The name DAN, meaning 'level' in Japanese martial arts, refers to the ladder system.

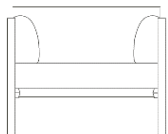

DAN is an environmentally friendly collection. The structure is made out of CO2 neutral, FSC certified solid ash wood from European origin.

The connectors are made out of recycled aluminium which reduces the CO2 emission with 80% compared to new aluminium.

Lucca

by Bulo Design in collab with Gensler

Lucca

by Bulo Design in collab with Gensler

Gensler is a global architecture, design and planning firm with 50 locations and more than 6000 professionals networking across the world.

Founded in 1965, the firm serves more than 3500 active clients in virtually every industry. Gensler supports clients at every stage of the design cycle. In 2019 Bulo and Gensler teamed up to design this lounge collection.

Monica and Lucca are quintessential Bulo. Both timeless and contemporary, they feel at home in different interiors. Classical woodworking and upholstery is combined with state-of-the-art production techniques.

Lucca is a convenient side table that also explores duality. With a simple click- and pull system the height of this laptop table can be adjusted to either 18.50" or 26.38". Also available with a fixed height of 22.44" and for larger laptops with a larger top and foot on a fixed height of 26.38".

Lucca shares many of the same characteristics of his big sister Monica. A combination of natural products and traditional craftsmanship with clever solutions for modern work environments, makes him a versatile and functional addition to your home and office.

Technical information:

Handle in solid wood: ash, black lacquered ash or walnut.

Oval table top in mdf with knife edge. Possible finishes: powdercoated, Fenix hpl or veneer, 0.63" thick of which 0.4" straight edge.

Round powdercoated metal column leg diam. 1.57"

There are 3 Lucca models:

- Table top 15.75" x 18.70", fixed height 22.44". Oval foot plate 11.02" x 13".
- Table top 15.75" x 18.70", height adjustable in 2 positions: 18.50" and 26.38". Oval foot plate 11.02" x 13".
- Table top 15.75" x 20.87", fixed height 26.38". Oval foot plate 11.02" x 14.96".

All mentioned heights are the table top heights and exclude the height of the handle. The handle is fixed and is 3.27" high.

We point out that wood is a natural material.

In products where veneer or solid wood is applied it is therefore possible that there is variation in color and grain within one order with multiple of these products in the same veneer or solid wood, or even within one product. Our wood samples are made from another tree than the final product. This means that the veneer or solid wood in the final products can deviate in color and design from our samples.

Monica

by Bulo Design in collab with Gensler

Monica

by Bulo Design in collab with Gensler

Gensler is a global architecture, design and planning firm with 50 locations and more than 6000 professionals networking across the world.

Founded in 1965, the firm serves more than 3500 active clients in virtually every industry. Gensler supports clients at every stage of the design cycle. In 2019 Bulo and Gensler teamed up to design this lounge collection.

Monica and Lucca are quintessential Bulo. Both timeless and contemporary, they feel at home in different interiors. Classical woodworking and upholstery is combined with state-of-the-art production techniques.

Monica is a soft lounge chair with a solid wooden base and a 'draped' upholstered soft shell resting on it. The duality of the chair is based on contrasts between hard and soft, static and fluid. It's almost as if she is tempting gravity with a soft skin that is hanging over a rigid wooden skeleton. Wood is in Bulo's DNA, so it was an obvious choice to leave the beautifully shaped wooden details visible. Monica is a contemporary piece with vintage look that's well adapted to the technicality and comfort of today.

Technical information:

Monica is available on 4 solid wooden legs or on a 4-star base

Solid wood: ash, black lacquered ash or walnut.

4-star base: black lacquered

We point out that wood is a natural material.

In products where veneer or solid wood is applied it is therefore possible that there is variation in color and grain within one order with multiple of these products in the same veneer or solid wood, or even within one product.

Our wood samples are made from another tree than the final product. This means that the veneer or solid wood in the final products can deviate in color and design from our samples.

With the use of COM or COL, even if Bulo accepted the order, there is no guarantee on the fabric or leather, its behavior on the chair or sofa after either short or long term use, nor on pilling or creasing. Our standard guarantee applies to the unupholstered parts of the product only. Bulo can not be held responsible for the fact that light colors tend to get dirty rather quickly.

Monica conference chair

by Bulo Design in collab with Gensler

Monica conference chair

by Bulo Design in collab with Gensler

Gensler is a global architecture, design and planning firm with 50 locations and more than 6000 professionals networking across the world.

Founded in 1965, the firm serves more than 3500 active clients in virtually every industry. Gensler supports clients at every stage of the design cycle. In 2019 Bulo and Gensler teamed up to design the Monica lounge collection. In 2025 the conference chair is a fabulous addition to the family.

Monica is quintessential Bulo. Timeless and contemporary, Monica feels at home in different interiors. Classical woodworking and upholstery is combined with state-of-the-art production techniques.

Monica conference chair is a soft chair with a 'draped' upholstered soft shell and visible -yet slightly retracted to avoid damage to the table top- solid wooden arm caps.

The duality of the chair is based on contrasts between hard and soft, static and fluid. It's almost as if she is tempting gravity with a soft skin that is hanging over a rigid wooden skeleton. Wood is in Bulo's DNA, so it was an obvious choice to leave the beautifully shaped wooden details visible. Monica is a contemporary piece with vintage look that's well adapted to the technicality and comfort of today.

Technical information:

Monica conference chair is available on 4 solid wooden legs or on a 5-star base with castors

Solid wood: natural ash, black lacquered ash or walnut stained ash.

5-star base: polished aluminium or black, universal castors

We point out that wood is a natural material.

In products where veneer or solid wood is applied it is therefore possible that there is variation in color and grain within one order with multiple of these products in the same veneer or solid wood, or even within one product.

Our wood samples are made from another tree than the final product. This means that the veneer or solid wood in the final products can deviate in color and design from our samples.

With the use of COM or COL, even if Bulo accepted the order, there is no guarantee on the fabric or leather, its behavior on the chair or sofa after either short or long term use, nor on pilling or creasing. Our standard guarantee applies to the unupholstered parts of the product only. Bulo can not be held responsible for the fact that light colors tend to get dirty rather quickly.

COM: price category 1.

COM required: Fabric width 55" : 2,2 yards

SL

by Léon Stynen

Fosbury & Sons Boitsfort

SL58

by Léon Stynen

SL58

SL58 is a re-edition of a chair created in 1958 by Belgian modernist architect, Léon Stynen. A design beautifully reduced to pure simplicity and continuity, the SL58 is a timeless classic.

The shell is made out of beech plywood. Steel base.

TAB

by Alain Berteau

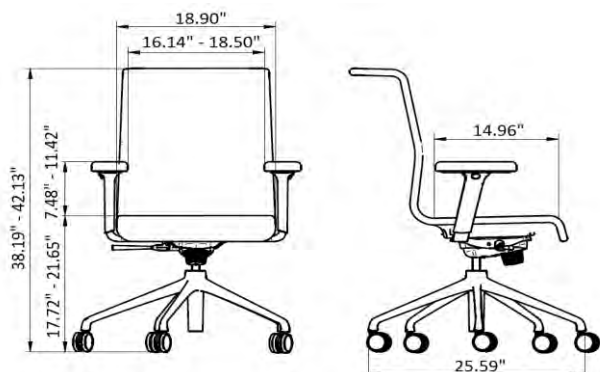

TAB Mesh

by Alain Berteau

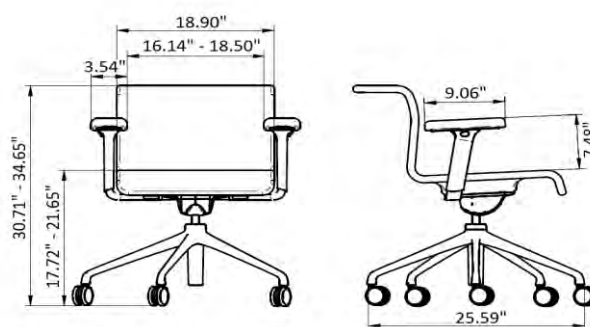

Tab Mesh is made with a self-supporting shrinking fabric that avoids the necessity for materials like plastic and non-recyclable foams. Using less materials also results in less weight of the end product. This makes the chair highly flexible and ergonomic in use. The Tab mesh chair comes with a tension regulating ring with a tilt angle of 16° and has 3d adjustable armrests. The fabric has a 300 000 martindale abrasion resistance; and passes both cigarette and butane flame test. Other upholstery is not possible on Tab Mesh. Other mesh colors are only possible as from 100 Tab Mesh chairs in one color.

High back task chair

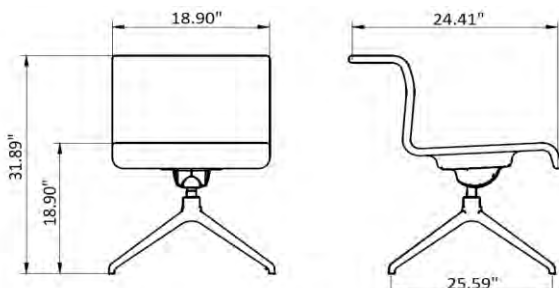

Adjustable seat height
5-star swivel base, black lacquered
on universal castors
Lower tension adjustment; 16° tilt; tilt lock
With or without 3D adjustable arm rests offering
height and depth adjustment and rotation.

Middle high back task chair

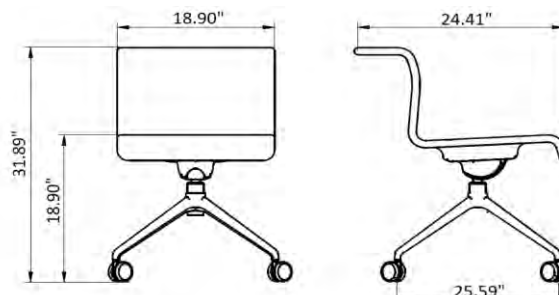

Adjustable seat height
5-star swivel base, black lacquered
on universal castors
16° tilt
With or without 3D adjustable arm rests offering
height and depth adjustment and rotation.

Visitor's chair on glides

Fixed height
4-star trestle base in polished aluminium or
black lacquered, on universal glides
Base turning circle: 25.6"
With or without 3D adjustable arm rests offering
height and depth adjustment and rotation.

Visitor's chair on castors

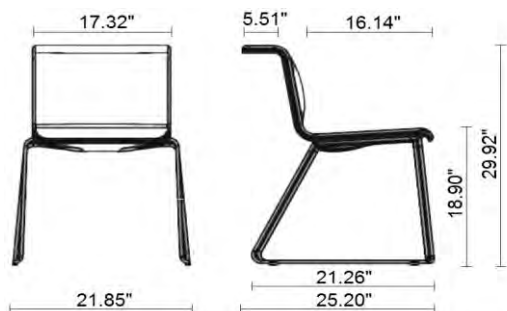

Fixed height
4-star trestle base in polished aluminium or
black lacquered, on universal castors
Base turning circle: 25.6"
With or without 3D adjustable arm rests offering
height and depth adjustment and rotation.

TAB Chair

by Alain Berteau

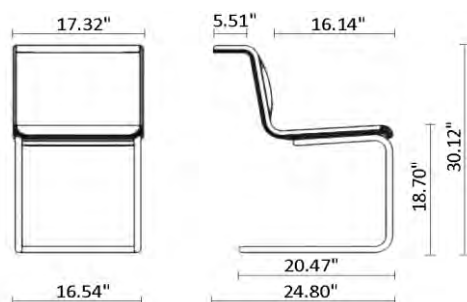

Tab Chair is a humanistic response to the various ways we like to sit.
The back has a flex which makes comfortable and ergonomic seating.

Visitor's chair on sledge base

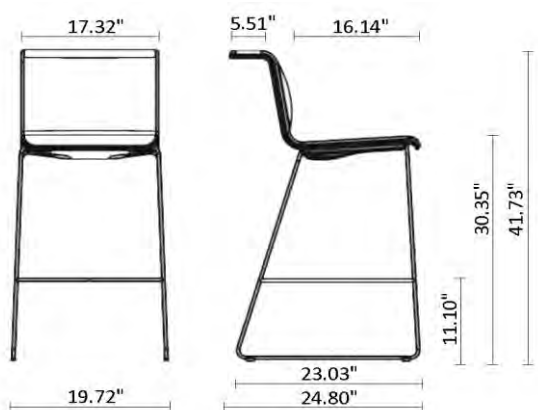

Sledge base in chrome or black lacquered,
on plastic glides or felt glides
Stackable up to 6 chairs
Including 2 interlocking connectors

Visitor's chair on cantilever (until end of stock)

Cantilever base black lacquered,
on plastic glides or felt glides

Bar stool

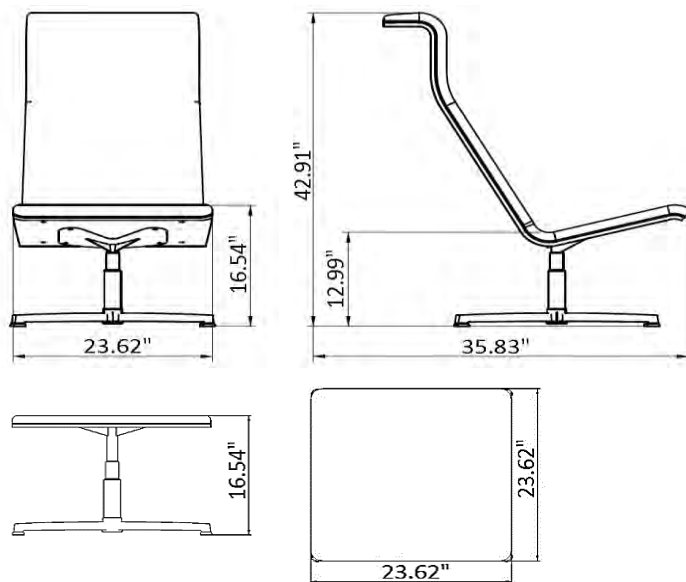

Base in chrome or black lacquered,
on plastic glides or felt glides

TAB Lounge Chair

by Alain Berteau

Tab Lounge maintains the signature profile whilst offering a more relaxed seating position.

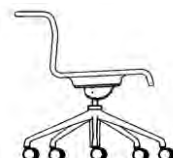

Tab Lounge & Ottoman

4- star swivel base
in polished aluminium or black lacquered
with automatic return mechanism
on felt glides

VVD Chair & VVD Slim Chair

by Vincent Van Duysen

VVD Chair

by Vincent Van Duysen

VVD Chair is a refined chair designed by belgian architect Vincent Van Duysen and characterized by pure lines, specific profile, remarkable ergonomic qualities and the use of innovative materials.

VVD Chair is made out of a metal frame and ilira stretch material, which provides a lot of comfort and makes it possible to have an exceptionally fine and light shape.

All desk chairs in the collection always have black glazed porcelain handles on the mechanism from 1st January 2020.

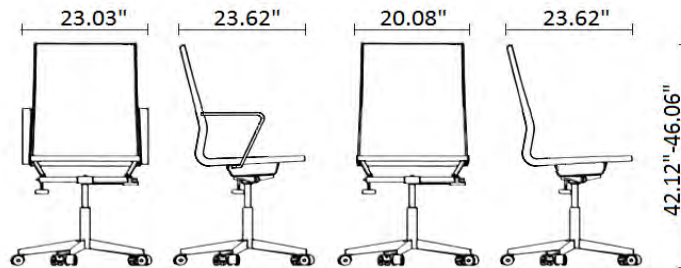

VVD Chair on castors is available with black pvc castors or castors with stainless steel cover. Hard castors for carpet floors or soft castors for hard floors or wooden floors.

New armrest design as from January 2023.

VVD CHAIR

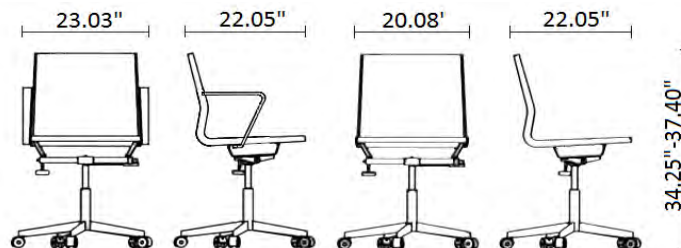

Desk chair with high back

VVD Slim Chair

by Vincent Van Duysen

VVD Slim Chair is a separate collection within the VVD Chair range, with an even slimmer shell.
The seat and back of VVD Slim Chair are upholstered all around, with or without seat stitching.

Desk chair

on 5-star base
Base diam.: 26.89"
Seat height range:
18.31" - 20.87"
Mechanism handles in
black porcelain

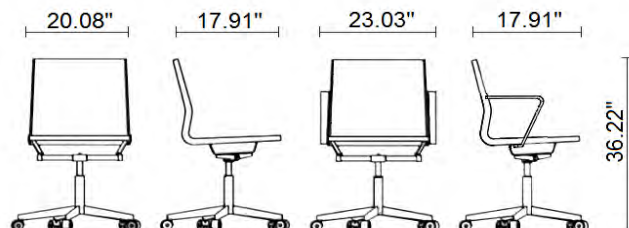

Visitor's chair on 5-star base

5-star base on castors
Base diam.: 26.89"
Seat height: 18.50"

Visitor's chair on 4-star base

4-star base on glides
Base diam.: 26.89"
Seat height: 18.50"

Lounge chair

4-star base on glides
Base diam.: 26.89"
Seat height: 17.32"

SEAT STITCHING

VVD Slim Chair
with seat stitching

VVD Slim Chair

VVD Bistro Chair

by Vincent Van Duysen

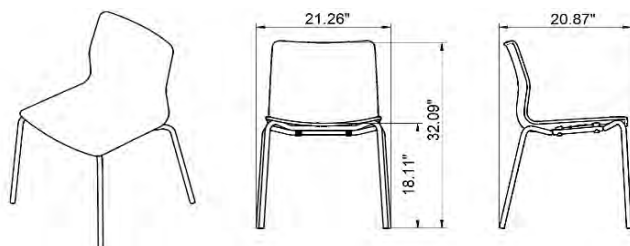

VVD Bistro Chair

by Vincent Van Duysen

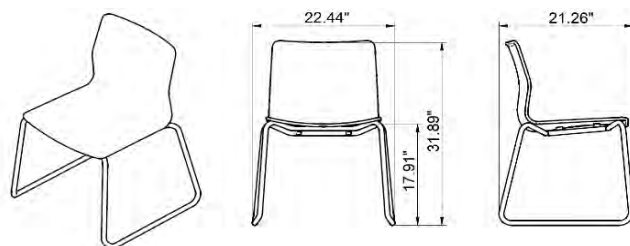

The VVD Bistro Chair is a continuation of the successful VVD Chair and VVD Slim Chair design by Vincent Van Duysen. All chairs have the ergonomic curve in the back in common. In line with current and future movements the shell of VVD Bistro Chair is made from recycled polypropylene. Tapping into its own waste stream, creating a largely circular production process, it comes in durable and ecological finish options for base and upholstery. Monocolor chairs have the base and the polypropylene seat in the same color.

DIMENSIONS

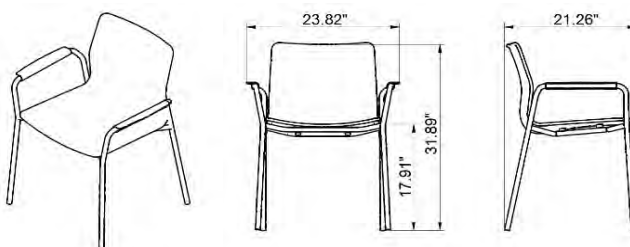

4 steel legs - stackable till 10 pieces

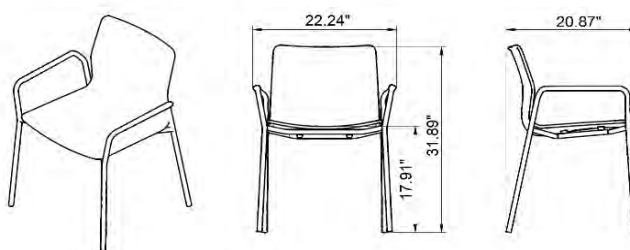

Steel sledge base - stackable till 10 pieces

With armrests, 4 steel legs - stackable till 10 pieces

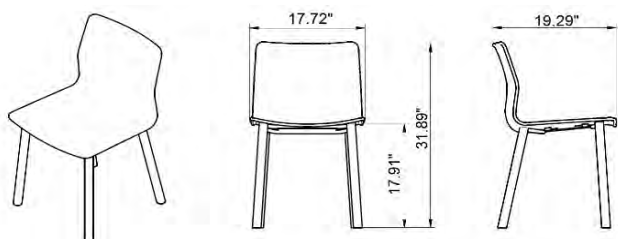

Unupholstered shell with polypropylene arm rest pads in the same color.

No arm rest pads with upholstered shell.

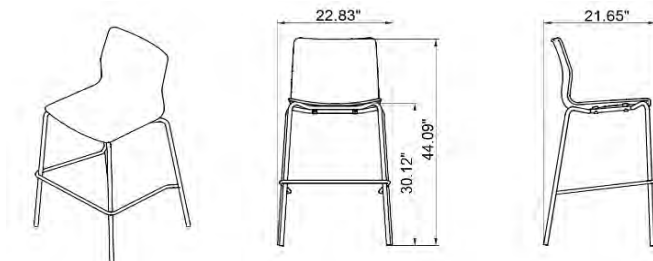

4 solid wooden legs - not stackable

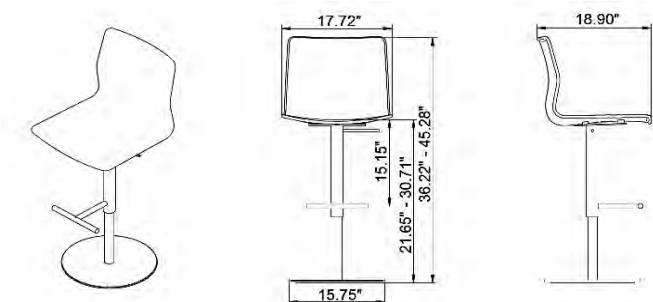

VVD Bistro Chair

by Vincent Van Duysen

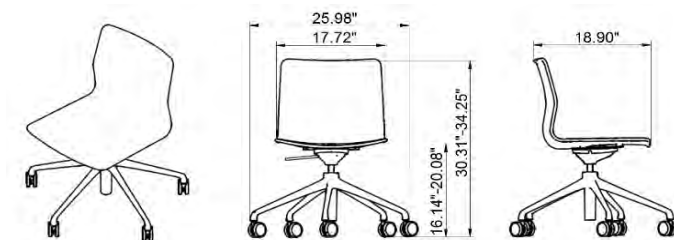

Barstool - stackable till 10 pieces

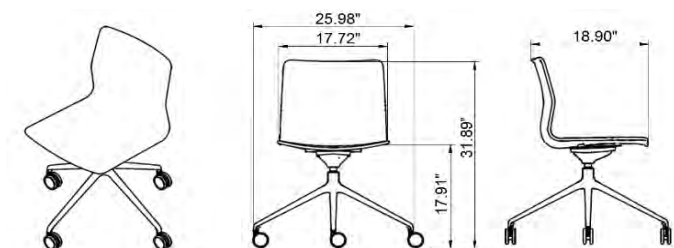

Barstool - height adjustable

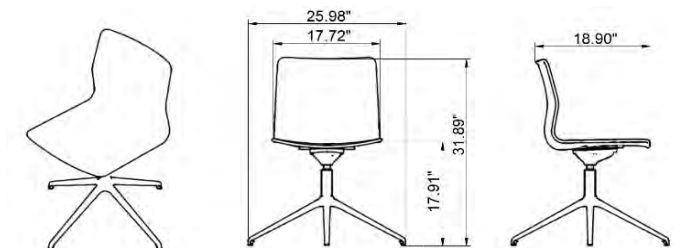

Desk chair on trestle 5-star base, swivel, on universal castors - height adjustable

Visitor's chair on trestle 4-star base, swivel, on universal castors - fixed height

Visitor's chair on trestle 4-star base, swivel, on felt glides - fixed height

VVD Bistro table

by Vincent Van Duysen

VVD Bistro table

by Vincent Van Duysen

A seemingly simple but well engineered wooden leg brings us to the essence of a table. A top. A set of legs. Full stop. Simplicity and elegance are once again found central in the design language of this VVDA collaboration. This timeless product comes in durable finishes.

TECHNICAL DESCRIPTION

Dimensions

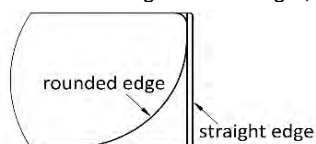

Round, diam. 33.46" x h 29.92", on 3 legs
Round, diam. 47.24" x h 29.92", on 4 legs
Oval, w 78.74" x d 39.37" x h 29.92", on 4 legs
Square, 35.43" x 35.43" x h 29.92", on 4 legs
Rectangular, 66.93" x d 35.43", on 4 legs

Leg finishes

Legs in lacquered solid beech wood, diam. 2.16". Lacquer colors: black, lily white, soft grey or grey-green

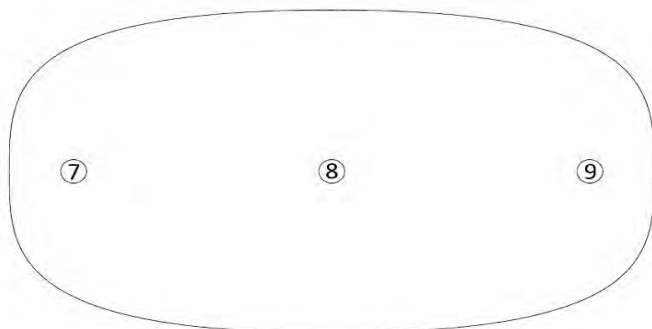

Top finishes

Lily white melamine with straight edges in matching 0.04"abs, 0.98" thick
Powdercoated mdf with rounded edges in colors lily white, soft grey or grey-green, 0.98" thick
Black Fenix hpl on black mdf with straight edges in black 0.04"abs, 0.98" thick
Veneer with straight veneer edges, 1.02" thick

Grommet

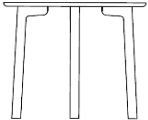

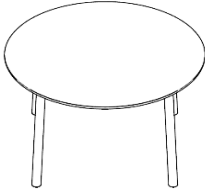

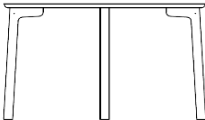

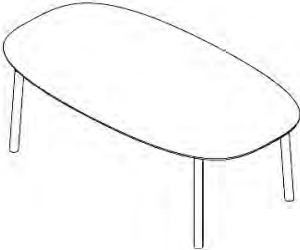

Only in oval table 78.74" x 39.37" and rectangular table 66.93" x 35.43".
Grommet positions left (7), central (8) or right (9)

DAN

by BuloDesign

DAN

by BuloDesign

Work isn't constrained anymore by space, time or place, it just happens. DAN thrives in this shift towards more informal, flexible workstations and is developed with the sole purpose to create multifunctional and enjoyable working environments. DAN is in essence a modular collection. The construction is based on traditional Japanese joinery.

It exists out of solid ash wood ladders and beams, and aluminium connecting parts.

The name DAN, meaning 'level' in Japanese martial arts, refers to the ladder system.

DAN is an environmentally friendly collection. The structure is made out of CO2 neutral, FSC certified solid ash wood from European origin. The tops and shelves are CO2 neutral. They are made out of laminated FSC certified chipboard.

The FSC certified veneer is from European origin.

The connectors are made out of recycled aluminium which reduces the CO2 emission with 80% compared to new aluminium.

BENCHES

Create benches with a start module and an end module.

Add one or more connecting modules between the start module and the end module for longer benches.

Example: a bench for 6 persons = 1 start module + 1 connecting module + 1 end module

STABILITY PANELS

The finish of the stability panels is always in 0.71" thick black melamine

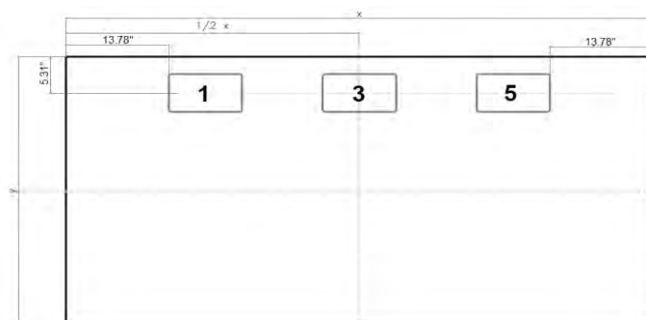

GROMMET POSITIONS

To ensure the correct cutout is made in the top, the type of grommet and its position must be indicated with the DAN table.

The grommet itself has to be ordered separately, see price list Electrification.

The below views are top views and seen from the user's side.

DAN single desk

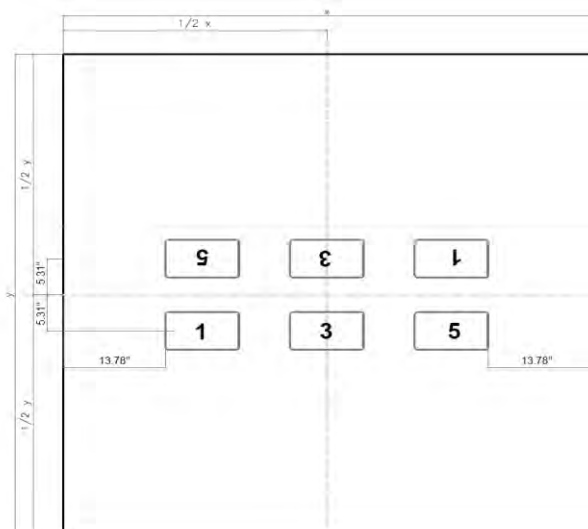

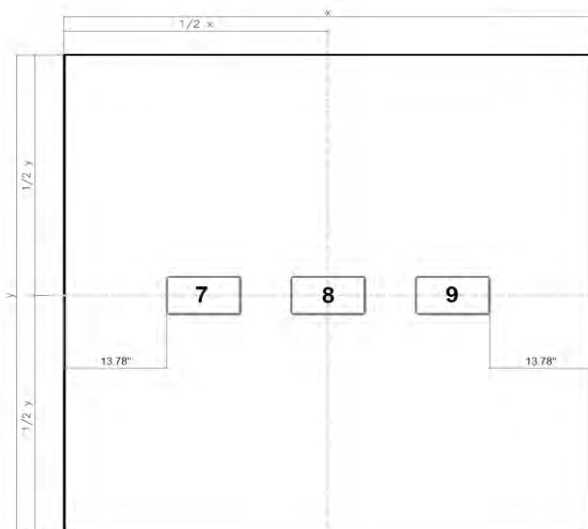

Grommet	Position 1, 3, 5	Position 7, 8, 9

Hub EL		✓
Normal	✓	✓
Point	✓	✓
Style (*)	✓	✓
Top Access	✓	✓
XXL	✓	✓

(*) 'Style' grommets require 8.27" between 2 opposite cutouts

DAN bench/meeting table

For benches/meeting tables existing out of modules, each module will have the same grommet cutout on the same position.

Double positions 1, 3 and 5 are possible as from a 62.99" deep table.
The 'Style' grommet requires 20.39" between 2 opposite cutouts.

grID

by BuloDesign

grID

by BuloDesign

grID is a height adjustable modular desk system suited for teamwork, individual working zones, fixed or flexible workstations, sit or stand and all heights in between.

grID is characterised by a clean and minimal approach.

The architectural language is inspired by the rigid minimalism of the De Stijl movement.

TOPS

0.51" thick mdf, finished in Fenix HPL

0.94" thick mdf, finished in veneer

0.98" thick chipboard, finished in melamine

HEIGHTS

Fixed height: 29.13"

Electronically height adjustable: 25.59" - 49.21". EU mains lead included to plug into the floor box.

The telescopic beam of the frame is always black. With height adjustable desks the motor is hidden in the telescopic black beam, operated through a control box and a control panel with display and up and down arrow.

Troubleshooting: the height adjustment can be reset by lowering the desk to its lowest possible height.

Standing desks with fixed height: 44.09"

Control panel with display
for height adjustable desks

HPL FENIX

FENIX NTM® is a super opaque nanotech material. It combines elegant aesthetic solutions white state-of-the-art technological performance. The external surface of FENIX NTM® involves the use of nanotechnology that allows thermal healing or superficial micro-scratches. FENIX NTM® has low light reflectivity, is anti-fingerprint and features a very pleasant soft touch. It is highly resistant to scratches, abrasion, rubbing and dry heat. It significantly reduces the bacterial load making its surface hygienic and easy to clean. It is also liquid repellent and mould-proof. FENIX NTM® is available on a maximum depth of 59.06"

SCREENS

A grid table top 31.50" or 35.43" deep can be equipped with a screen, fixed to the table top with L-shaped profiles.

All grID table tops 49.21" deep or deeper can be equipped with a built-in screen on 2 feet through the top

To ensure the correct fittings are made in the top, the type of screen, its position and its width need to be indicated with the grID table. The screen itself has to be ordered separately. see price list Screens

CODE COMPOSITION EXAMPLE: G21S1409E011K3VAL

[illegible]

grID

by BuloDesign

GROMMET POSITIONS

To ensure the correct cutout is made in the top, the type of grommet and its position must be indicated with the grID table.

The grommet itself has to be ordered separately, see price list Electrification.

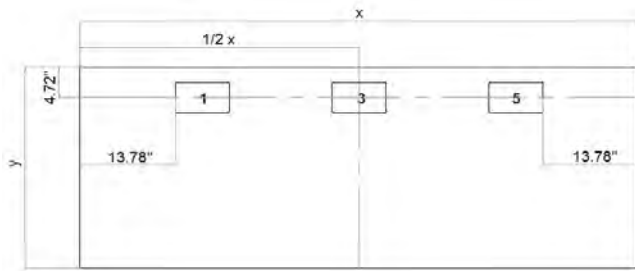

The below views are top views and seen from the user's side.

Cutouts 1, 5, 7 and 9 start at 13.78" from the edge.

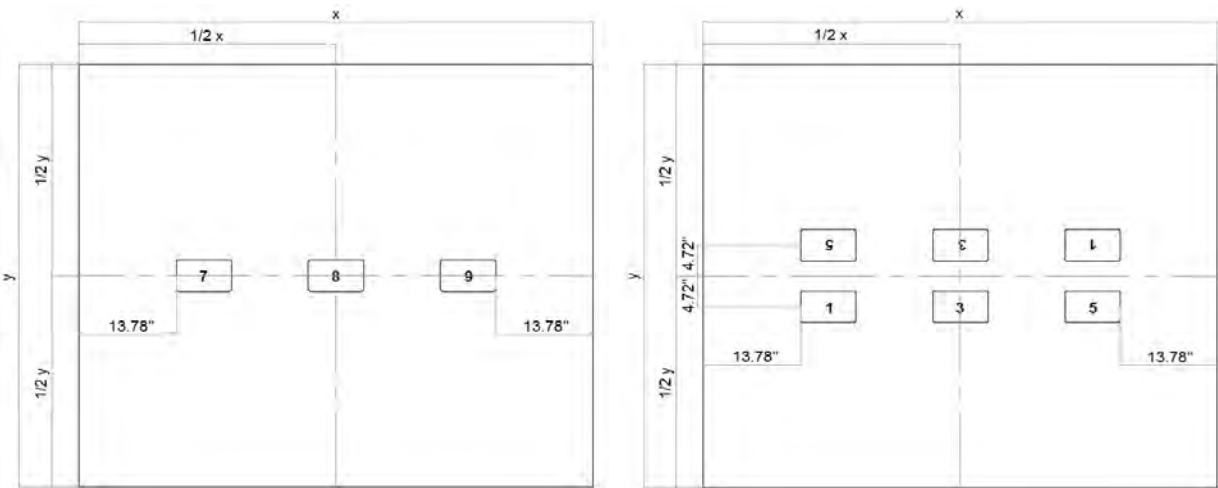

Cutouts 3 and 8 are positioned centrally.

grid tops 31.50" and 35.43" deep have a central beam underneath the top; positions 7, 8 and 9 are not possible.

grlD table top 31.50" or 35.43" deep

grID table top 49.21" deep or deeper

H2O

by Claire Bataille & Paul ibens

GROMMET POSITIONS

To ensure the correct cutout is made in the top, the type of grommet and its position must be indicated with the H2O table.

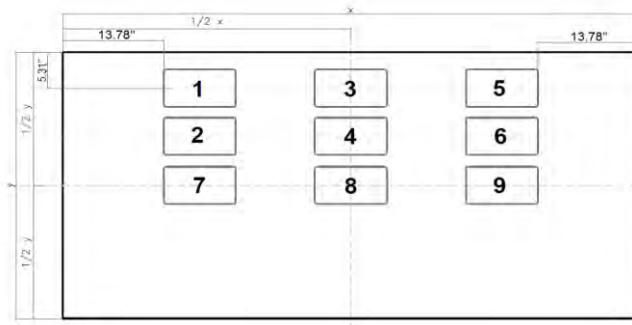

The grommet itself has to be ordered separately, see price list Electrification.

The below views are top views and seen from the user's side.

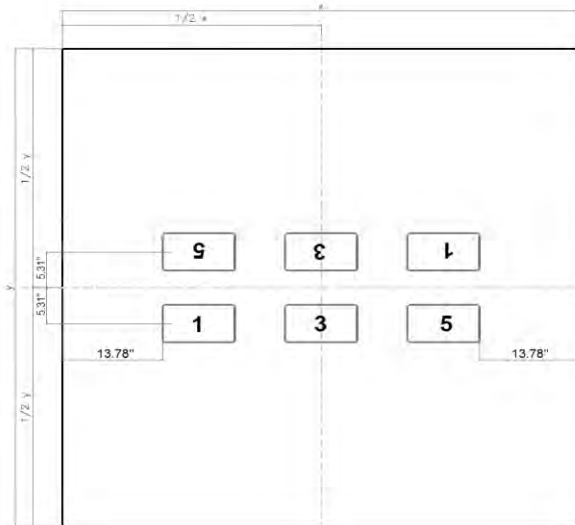

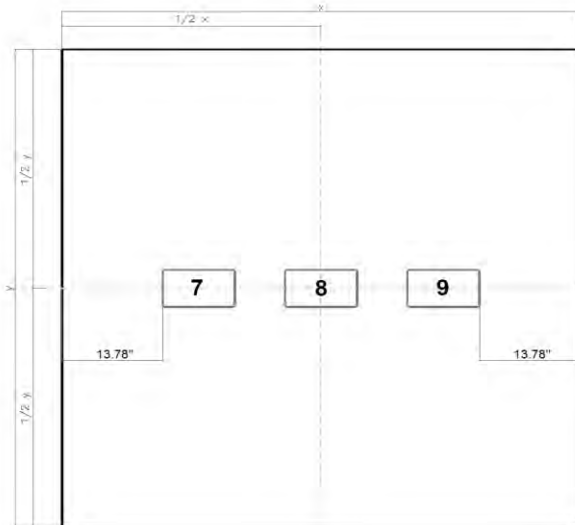

The cutouts 1, 2, 5, 6, 7 and 9 start at 13.78" from the edge.

The cutouts 3, 4 and 8 are positioned centrally.

For H2O table 31.50", 39.37" or 47.24" deep

For H2O table/bench/meeting table as from 55.12" deep

Grommet	Position 1, 2, 3, 4, 5, 6	Position 7, 8, 9

Kei

by BuloDesign

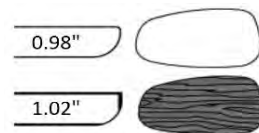

Kei

by BuloDesign

Pebbles on the beach or river banks are irregular and random yet they fit and belong together. This is the concept that "inspired" the modular system Kei. The elements can be configured in a myriad of different ways and allows for easy re-configuration as it's free of the grid planning systems. Kei creates an organic landscape when grouped together or used as an individual shape.

TABLE TOP FINISHES

- Always with fillet edging
- mdf powdercoated lily white, 0.98" thick
- oak veneer, 1.02" thick: natural, black lacquered or red lacquered
- The fillet edging can not be veneered all the way round.
- The lacquered mdf will be visible in the curve of the lower edging.

BASE

Always lacquered in coffee bean color

DESKS

Dimensions

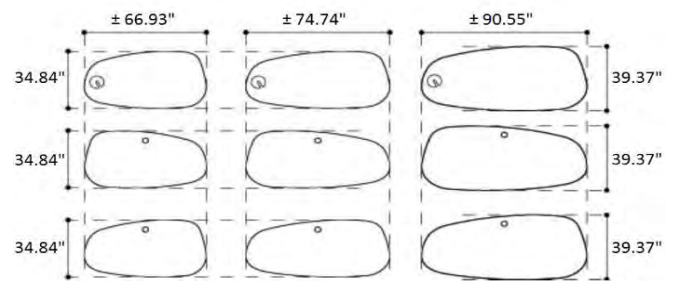

- $\pm$ w 66.93" x d 34.84"
- $\pm$ w 78.74" x d 34.84"
- $\pm$ w 90.55" x d 39.37"

Heights

- Height adjustable with lever 24.41" - 33.46"
- Fixed height 29.53"

Grommets

- felt pod with porcelain cover on the small side of the desk
 - * white porcelain cover with lily white powdercoated tops
 - * black porcelain cover with veneer tops
- round hole, centrally positioned on the visitor's side
 - * deepest side of the desk on the right hand side
 - * deepest side of the desk on the left hand side

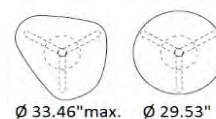

Base on adjustable feet

All Kei desks come with 3 underdesk cable clamps as a standard

SIDE TABLES

Tops

- pebble shaped, $\pm$ 33.46" x 33.46"
- round, diam. 29.53"

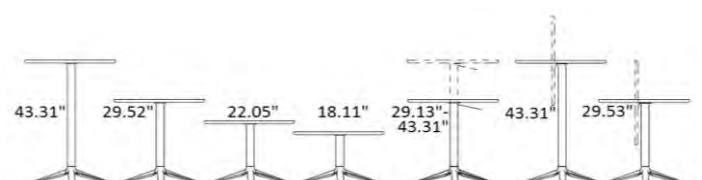

Heights

- 18.11", coffee table height
- 22.05", coffee table height
- 29.53", desk height
- 43.31", standing height
- 29.13"-43.31" height adjustable with gas lift

Flip tops

- 29.53", desk height
- 43.31", standing height

Base on adjustable feet or on castors

Kei

by BuloDesign

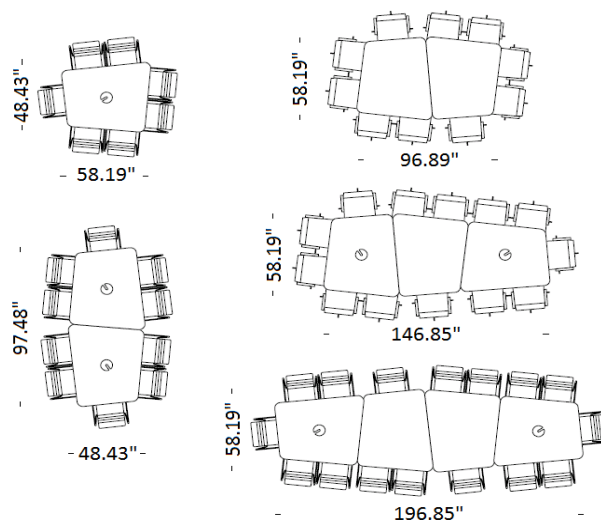

MEETING TABLES WITH ORGANIC SHAPED TOP

Dimensions: $\pm 58.19'' \times 48.50'' \times h 29.53''$
Its unique shape offers various configurations.

Grommets

- without grommet
- with grommet and porcelain cover. Grommet with metal bracket to hold 2 socket outlets of each 2 modules
 - * white porcelain cover with lily white powdercoated tops
 - * black porcelain cover with veneer tops

The central column base guides the cables to the floor and is covered with black 3D knitted tricot fabric

RECTANGULAR MEETING TABLES

Fixed top or flip top

Dimensions

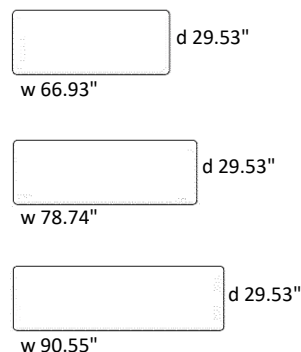

- $\pm w 66.93'' \times d 29.53''$
- $\pm w 78.74'' \times d 29.53''$
- $\pm w 90.55'' \times d 29.53''$

Heights

- fixed top, base on adjustable feet: h 29.53"
- fixed top, base on castors: h 30.71"
- flip top, base on adjustable feet: h 28.35"
- flip top, base on castors: h 29.53"

Base

- on adjustable feet or on castors
- flip top tables come with a coffee bean lacquered crossbeam
- the flip top mechanism can be operated with one hand

STANDING HEIGHT MEETING TABLES

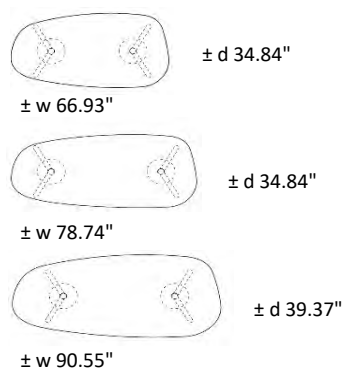

Fixed top, pebble shaped

Dimensions

- $\pm w 66.93'' \times d 34.84''$
- $\pm w 78.74'' \times d 34.84''$
- $\pm w 90.55'' \times d 39.37''$

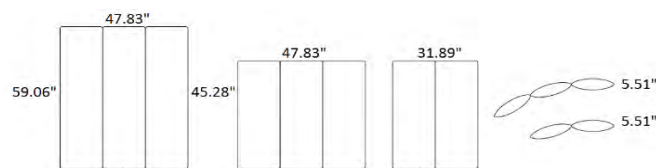

Fixed height: 43.31"

Base on adjustable feet

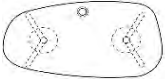

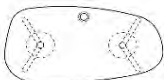

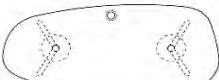

SCREENS

Light core in environmentally friendly EEP (expanded polypropylene) covered in 3D knitted tricot fabric
Easy to move visual separation, non acoustic

Normal

by Jean Nouvel

Normal

by Jean Nouvel

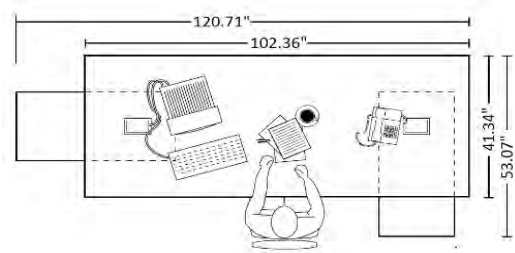

Normal is Jean Nouvel's contemporary rendition of the classic executive office furniture of the past. The proportions are bold and architectural and the forms are clean and pure.

TECHNICAL INFORMATION

DESK

A desk consists out of 3 elements: a top supported by a pedestal on one side and by a credenza on the other side. Which one on the left and which one on the right can be chosen before production. The top is connected to both volumes by means of 2 star-shaped elements. The credenza is turned 90° and has 2 lateral doors.

Total dimensions of the desk: w 120.71" x d 53.07" x h 29.53"

Work top

Dimensions: w 102.36" x d 41.34" x h 1.77"

The edges of the 1.77" thick work top are made out of strips in solid wood.

Two grommets on strategic places (for cable management) have covers in the same finish as the top and an anthracite lacquered frame. The star-shaped elements guide cables from the electrification space at the back of the pedestal, through the integrated horizontal cable duct in the underside of the desk top, to the credenza.

Pedestal

Dimensions: w 20.20" x d 42.44" x h 22.83". The borders are in solid wood.

The pedestal is not lockable.

The back compartment of the pedestal functions as a cable space and has a door.

The front of the pedestal has various possible lay-outs:

- 1 hinged door with glass shelf
- 1 pull-out shelf and 2 drawers
- 1 pull-out shelf and 1 A4 filing drawer
- 1 drawer and 1 A4 filing drawer

Credenza

Dimensions: w 42.44" x d 20.20" x h 22.83". The borders are in solid wood and have glass or veneer side panels.

Each compartment is equipped with a glass shelf.

Front layout: double door, centrally hinged, both lockable with cylinder lock.

Finishes

EK European oak veneer

- top in oak veneer with solid ash edges
- pedestal and credenza with carcass in oak veneer and frames in solid oak
- credenza with glass shelves/glass side panels in blue glass

EZ black lacquered ash veneer

- top in black lacquered ash veneer with black lacquered solid ash edges
- pedestal and credenza with carcass in black lacquered ash veneer and frames in black lacquered solid ash
- credenza with glass shelves/glass side panels in opal glass

STORAGE UNITS

4 types

Low storage unit d 20.20" x h 32.87", with 4 doors w 71.30" or with 6 doors w 106.50"
High storage units d 20.20" x h 63.11", with 4 doors w 71.30" or with 6 doors w 106.50"

Lay-out

A storage unit with 4 doors has a central compartment with lockable double hinged doors and on both ends a half compartment with a hinged door both at the front and at the back side of the storage unit.

A storage unit with 6 doors has 2 central compartments with lockable double hinged doors and on both ends a half compartment with a hinged door both at the front and at the back side of the storage unit.

The half compartments each have 1 (low unit) or 2 (high unit) glass shelves.

The doors of the half compartments are not lockable.

The back of the storage unit is identical to the front so the storage unit can be used freestanding in a room. At the back side the half compartments have a door, the central compartments have a fixed back. The sides have a frame in solid wood and a panel in HPL, veneer or in colored glass.

Finish

EK European oak veneer

- carcass in oak veneer with solid oak edges
- interior central compartment(s) in lily white melamine
- half compartments with blue glass shelves
- half compartments with either oak veneer side panels or blue glass side panels

EZ black lacquered ash veneer

- carcass in black lacquered ash veneer with black lacquered solid ash edges
- interior central compartment(s) in black melamine
- half compartments with opal glass shelves
- half compartments with either black lacquered ash veneer side panels or opal glass side panels

SW satin walnut veneer

- carcass in satin walnut veneer with solid ash edges
- interior central compartment(s) in black melamine
- half compartments with red glass shelves
- half compartments with either black lacquered ash veneer side panels or red glass side panels

F1 lily white Fenix HPL / F4 black Fenix HPL

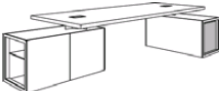

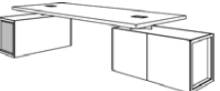

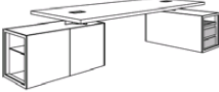

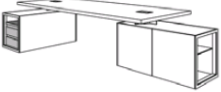

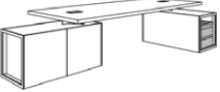

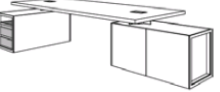

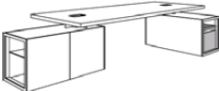

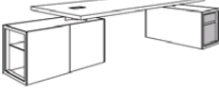

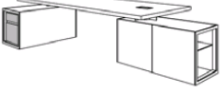

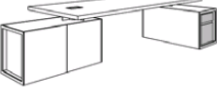

- carcass in Fenix HPL with solid ash edges
- white Fenix HPL with interior central compartment(s) in lily white melamine
- black Fenix HPL with interior central compartment(s) in black melamine
- half compartments with opal glass shelves
- half compartments with either Fenix HPL side panels or opal glass side panels

FENIX HPL

FENIX NTM® is a super opaque nanotech material. It combines elegant aesthetic solutions with state-of-the-art technological performance. The external surface of FENIX NTM® involves the use of nanotechnology that allows thermal healing of superficial micro-scratches. FENIX NTM® has low light reflectivity, is anti-fingerprint and features a very pleasant soft touch. It is highly resistant to scratches, abrasion, rubbing and dry heat. It significantly reduces the bacterial load making its surface hygienic and easy to clean. It is also liquid repellent and mould-proof.

SB55

by Stéphane Beel

SB55

by Stéphane Beel

...it's all about the legs he said, and she made another twist...

SB55 is a table collection designed by Belgian architect Stéphane Beel.

The design focuses on the V-shaped trestle structure in solid wood

TOPS

0.98" thick chipboard finished in melamine or Fenix hpl, with black abs edging

0.94" veneer on mdf with matching edges

BASE

2V-legs and 5V-legs in solid wood: black lacquered ash, walnut color stained ash or solid natural oak

FENIX HPL

FENIX NTM® is a super opaque nanotech material that combines elegant aesthetic solutions with state-of-the-art technological performance. With low light reflectivity, its surface is extremely opaque, anti-fingerprint and features a very pleasant soft touch. Thanks to the use of nanotechnologies, FENIX NTM thermally heals any superficial micro-scratches. In addition, FENIX NTM® is highly resistant to scratches, abrasion, rubbing and dry heat. It also withstands impacts, reduces significantly the bacterial load making its surface hygienic and easy to clean. It is also liquid repellent and mould-proof. FENIX NTM® is only available for tops with a maximum depth of 59.06"

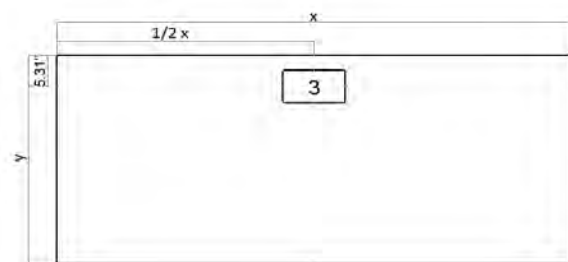

GROMMET POSITIONS

To ensure the correct cutout is made in the top, the type of grommet and its position must be indicated with the SB55 table.

The grommet itself has to be ordered separately, see price list Electrification.

Senses

by Nathalie Van Reeth & BuloDesigners

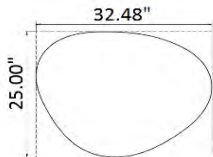

Senses

by Nathalie Van Reeth & BuloDesigners

It is all about the senses.

Van Reeth's inspiration is about bringing softness and tactility back to the office or home through organic shapes and rich layers of materials and textures. People spend most of their life at work and she wanted to design a desk system that brings comfort to the mind and body and stimulates the senses. With a departure from rectilinear forms, the organic shapes paired with combinations of authentic materials such as micro-fibre, upcycled berries, woods and metals. Senses brings a softer and richer experience back to work.

ORGANIC SHAPES: EGG, BEAN & ROCK

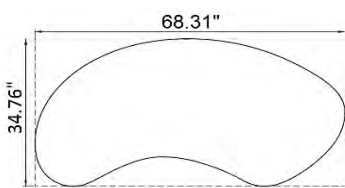

Egg, max w 32.48" x d 25.00"

For side tables

Fixed heights: 13.78", 21.65" and 29.53"

Base: organic shaped foot on oval central column in lacquered metal (black, grey-green or beige)

Top finishes: glass, veneer, Fenix hpl, melamine, Paperfactor

Bean, max. w 68.31" x d 27.56"/34.76"

For desk, benches and coffee tables

Heights: side table h 13.78" and desk/bench with fixed height 29.53" or electronically height adjustable 25.59" - 51.18"

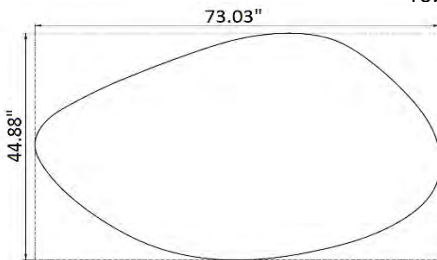

Desk base: 2 black lacquered T-shaped legs or 2 oval legs (the large leg with 2 round holes for vertical cable management)

Bench base: black lacquered metal

Coffee table base: 2 oval legs

Oval legs finished in beech veneer, in walnut veneer or in lacquered black mdf.

Top finishes: Fenix hpl, melamine, veneer, Paperfactor

Rock, max. w 73.03" x d 44.88

For desk/meeting table and coffee tables

Fixed heights: 13.98" and 29.53"

Top finishes: Fenix hpl, melamine, veneer, Paperfactor

Base: 2 oval legs (the large leg with 2 round holes for vertical cable management) finished in beech veneer, in walnut veneer or in lacquered black mdf.

EDGE FINISHES

Senses table tops finished in melamine, Fenix HPL and veneer have black edges

Melamine and Fenix HPL tops have black ABS edges

Black mdf tops with a veneer finish have transparently lacquered edges

Glass tops have a black mdf supporting top, with transparently lacquered edges

Paperfactor tops have the edges in the same material.

FENIX HPL

FENIX NTM® is a super opaque nanotech material. It combines elegant aesthetic solutions with state-of-the-art technological performance. The external surface of FENIX NTM® involves the use of nanotechnology that allows thermal healing of superficial micro-scratches. FENIX NTM® has low light reflectivity, is anti-fingerprint and features a very pleasant soft touch. It is highly resistant to scratches, abrasion, rubbing and dry heat. It significantly reduces the bacterial load making its surface hygienic and easy to clean. It is also liquid repellent and mould-proof.

PAPERFACTOR

Paperfactor is cellulose micro-fibers. The formula of components is based on an ancient Italian technique, originally used in the restoration of catholic statues. Paperfactor was developed in collaboration with the university of Salento (it), and is water resistant as well as fire retardant. Senses is the first furniture range ever to use this material.

Senses

by Nathalie Van Reeth & BuloDesigners

BENCHES

As a standard, all tops in a bench setup have the same finish, are all either with a fixed height (29.53") or all electronically height adjustable (25.59" - 51.18") and all have either no grommet or the same grommet on the same position.

For a mixture of both fixed height and electronic height adjustment within one bench, please contact us.

Cables can be guided through the horizontal beams of the bench base. Vertical cable management is not integrated.

Within a bench, 2 bean tops in a straight row are connected with a cable tray with cover.

ELECTRONICAL HEIGHT ADJUSTABILITY OF BEAN SINGLE DESKS ON T-LEGS AND BENCHES

Range: 25.59" - 51.18"

Display with up/down arrow

Cable with EU plug included. A separate mains lead is required if you require a different plug.

Control panel with display for height adjustable desks

WIRELESS CHARGER

Fixed to the underside of the desk top on the left hand side, the charger is not visible on the work surface and therefore does not affect the look of the desk.

The wireless charger can be applied on all types of work surfaces.

Only a Qi certified phone can be charged wireless (for example models as from iPhone 8, Samsung S6, Huawei Mate 20Pro, ...)

For phones that are not Qi certified, a separate Qi cover can be acquired.

It doesn't matter from which country the phone is. The system will recognize when it needs to transmit power to your device.

A small "tone" will indicate that your mobile device is in the right position. A small "buzz" indicates that the ZENS PuK is charging.

Output: 5 Watt. There are EU, UK and US power adapters available.

Usage: charges smartphones and smartwatches

GROMMET POSITIONS

To ensure the correct cutout is made in the top, the type of grommet and its position must be indicated with the Senses table.

Each Bean bench workstation will have the same grommet cutout in the same position. No grommet cutouts possible in the meeting spaces of the closed configurations. The grommet itself has to be ordered separately and is not included in the price of the table.

SCREEN POSITIONS

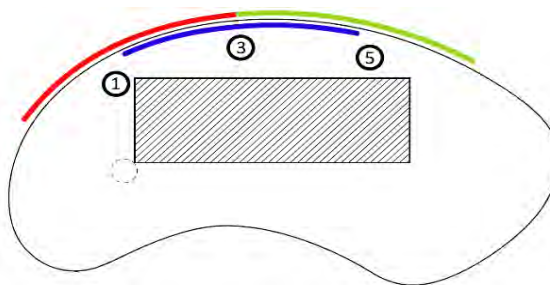

All bean tops have inserts to place a Senses screen on 3 positions: left, central and right

circles: round grommet

- 1 left
- 3 central
- 5 right

dotted circle: wireless charger

shaded rectangle: cable net

red: screen left
blue: screen central
green: screen right

VVD Desk

by Vincent Van Duysen

VVD Desk

by Vincent Van Duysen

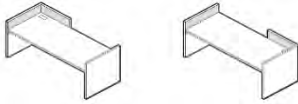

Desk is Vincent Van Duysen's interpretation of the "cubicle" desk system. Minimal yet beautifully detailed, the VVD Desk has timeless aesthetics. It is Van Duysen's architecture scaled down to a compact piece of furniture.

Executive desk

L-shaped panel either at the left hand side or at the right hand side
w 98.03" x d 39.88" x h 37.40"
Work top height: 29.53"

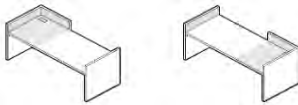

Finishes:

- HPL :
- side panels with Corian edges, w 1.77" x h 0.47"
 - the parts of the panels facing the users are upholstered with Divina fabric by Kvadrat
 - top with a grommet type Normal (built-in socket outlet not included, see price list Electrification)
 - Grommet frame in chrome, cover in the same HPL as the top
 - cable net included

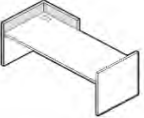

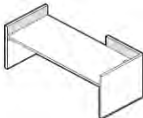

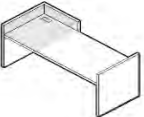

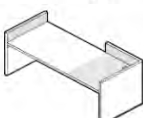

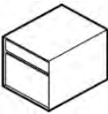

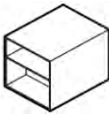

Wenge veneer:

- side panels with edges in solid wenge wood, w 1.77" x h 0.47"
- the parts of the panels facing the users are upholstered with black saddle leather
 - The work top partly has an inlay in black saddle leather on the side of the L-shaped panel
- top with a grommet type Normal (built-in socket outlet not included, see price list Electrification) in the saddle leather inlay
 - Grommet frame in coffee bean color lacquered, cover in black saddle leather
- cable net included

TECHNICAL DESCRIPTION ACOUSTIC PANELS

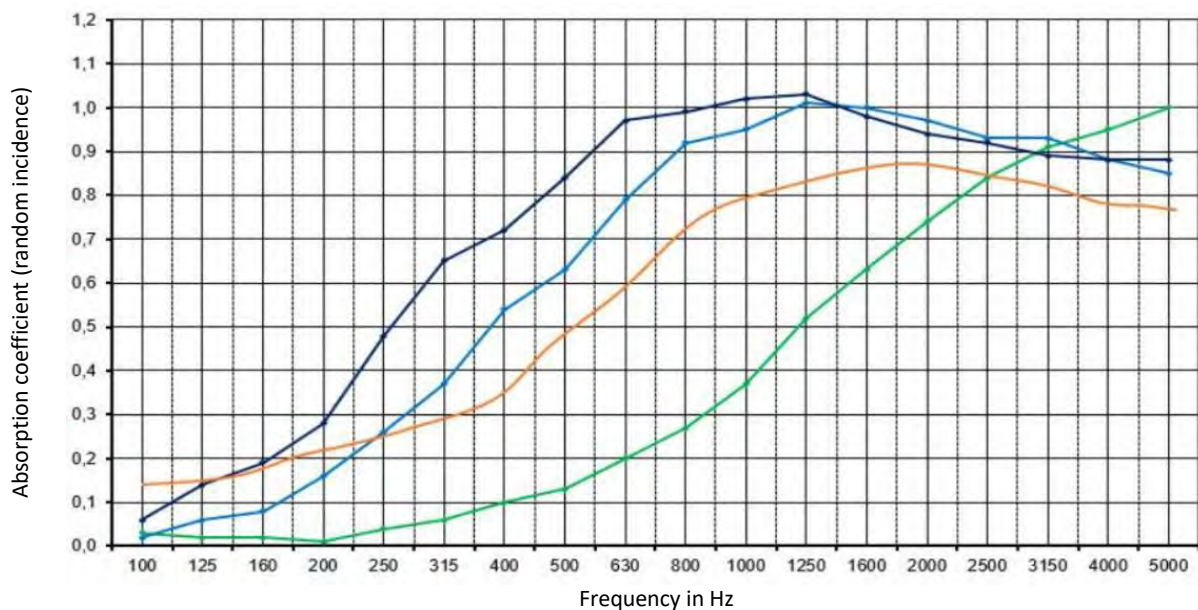

Material: 100 % polyester
Weight: 4000 g/10.76 ft²
Thickness: 0.98"

Made from compressed recyclable polyester fibers, the acoustic felt panels are very efficient as sound insulation. Thanks to the flexible composition of the panels, the sound is absorbed at different frequencies. The sound penetrates the surface and spreads in the panels. Due to the friction with the fibers, the sound waves are converted into thermal waves (porous absorption) and kinetic energy (absorption by resonance). Because the fibers are strongly compressed, the effect is much greater than with conventional materials. The underlying acoustic structure of the felt panels makes the absorption even more efficient.

- Excellent sound absorption despite the wide frequency range
- Flexible and durable material
- Light weight
- Can be used as a composite material
- Water-repellent, oil-repellent and antibacterial
- Odorless, with a low emission of substances or odors from wall coverings and ceilings
- Fire resistant: B, S2 and D0 (low flammability) according to DIN EN 13501-1 with a wall distance of 3.15'

Tested standards: ISO 354: 2003 & ISO 11654

Measurement of sound absorption in a reverberation room (ISO 354:2003/ISO 11654)

- Panel 1.57" - 4000 g/10.76 ft²
→ Panel 0.98" - 4000 g/10.76 ft²
Panel 0.39" - 2800 g/10.76 ft²
Panel 0.47" - 2800 g/10.76 ft² (with air gap)

Electrification

Electrification

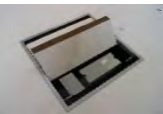

Bulo offers grommets, power sockets and power cables for all countries.
The products in this price list are for use in the USA and Canada.
All prices in this Electrification price list are your purchase prices.

All our cables are fitted with a universal Wieland GST 18/3 plug
All socket outlets are equipped with a lead of +/- 35"
Data plugs are RJ45, cat.6, with gender changer
HDMI and VGA/audio come with a gender changer

Grommet positions are determined per collection and can be found in the price list of the collection, as well as the upcharge for the cutout. Cutouts to accommodate third party grommets on request.
Power sockets are not included in the price of the grommet, see next page.
Not suited for use with Mac Book Pro chargers.

Modular Storage Units

by BuloDesign

Modular Storage Units

by BuloDesign

Storage units with hinged doors.

Row of multiple units with casing to create the look of being a unit in one piece.

Shelves included

New sizes as from 1st January 2023

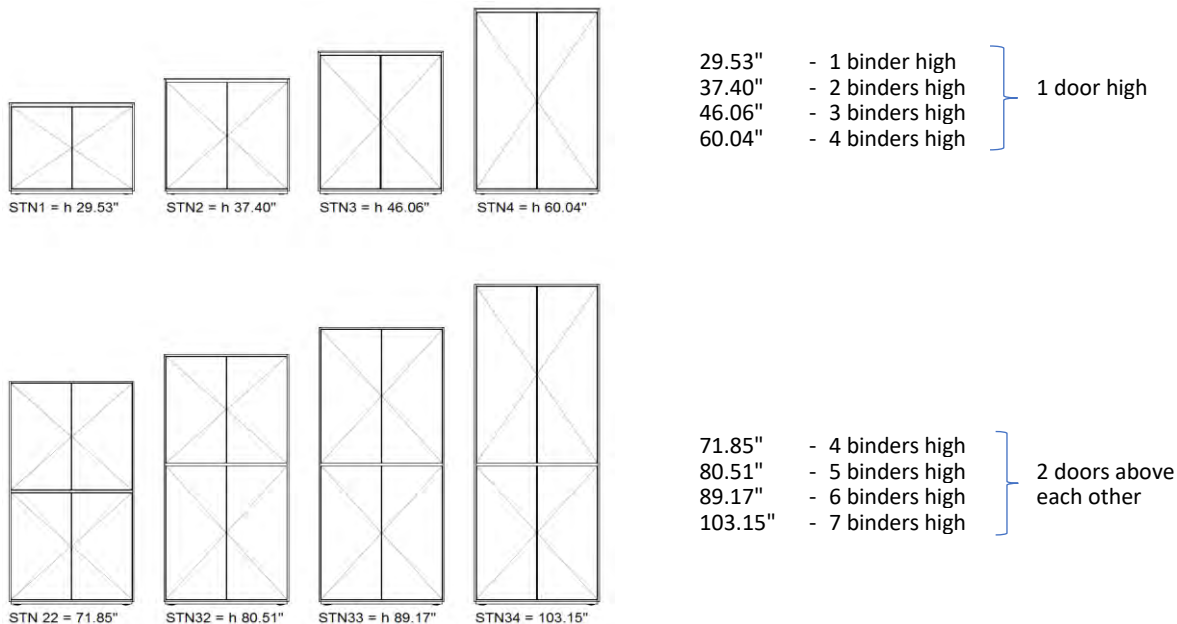

DIMENSIONS

Width:

single unit	- 36.69"
double unit	- 72.36"
row of 3 units	- 108.07"
row of 4 units	- 143.82"
row of 5 units	- 183.07"
row of 6 units	- 215.24"

Depth: 18.90"

Height:

TOPS

- Top of single unit in one piece
- Top of double unit in one piece
- Top of row of 3 units in one piece
- Top of row of 4 units: in 2 parts
- Top of row of 5 units: in 2 parts
- Top of row of 6 units: in 3 parts

LOCK: without lock or with black cylinder lock and 2 keys.

ADDITIONAL FINISH OF THE BACK FOR FREESTANDING UNITS

We advise to choose a finish for the back when the unit is placed freestanding in the room. Preferably this is the same finish as the casing. To be specified within the code of the unit. Upcharge for finished back, see page 199

A unit placed with its back against a wall does not require a back finish.

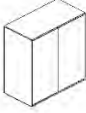

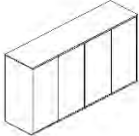

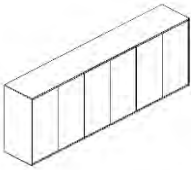

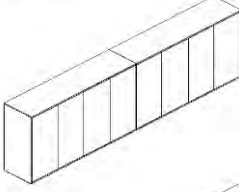

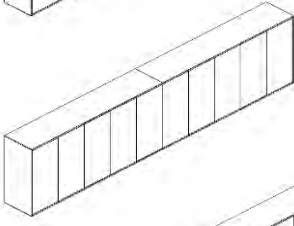

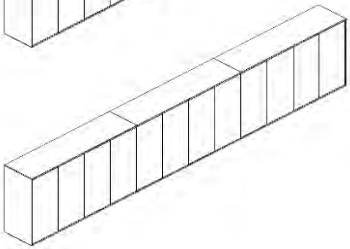

CODE COMPOSITION EXAMPLE:

STN	3	0	1	0	1	0	1	0	0	0	1	K
												lock
												finish handle
												back finish for freestanding unit
												finish back, interior and shelves
												finish doors
												finish side panels, top and plinth
												number of storage modules next to each other
												storage unit height = binder height

Mr. Walter

by BuloDesign

Mr. Walter

by BuloDesign

Mr. Walter is a tribute to the original file pedestal that Bulo began with in 1963. Made of wood, Mr. Walter is a contemporary storage collection that is both functional in the office environment as well as aesthetically warm in the home. Various accessories are available for organization and cushion tops can be added to create an extra seat for collaboration at the desk.

TECHNICAL INFORMATION

The carcass is made out of powdercoated mdf panels in mitre joint. The top panel is recessed offering a multifunctional use for office supplies, a cup of coffee, magazines or a cushion, allowing the pedestal to function as an additional seating element. The top panel can be finished in various melamine or veneer finishes to match with the colour and/or material of the table. The box file drawer can be used for hanging files, but also for binders or for personal items such as a handbag. The pedestal can be equipped with a central locking mechanism. The lock is black.

ENVIRONMENTALLY FRIENDLY

Compared to a metal pedestal, the Mr. Walter pedestal - carcass and fronts in wood - has a remarkably smaller ecological footprint. The production of powdercoated mdf ($\pm 60\%$ of the total material) absorbs more CO₂ than is emitted. The production of a Mr. Walter pedestal produces at least 50% less CO₂ emission than the production of a metal pedestal.

Mr. Walter

Carte Blanche

Carte Blanche

Bulo's unique collaboration with architects and designers from outside the company - few of them are specialized in furniture or interior design - has resulted in uncompromising, smart designs
These talented people present their vision of their ideal workstation in Bulo's Carte Blanche collection.

Carte Blanche

1. Easy Rider by Danny Venlet

Inspired by uninspiring seating in airport waiting areas, Danny Venlet created this mobile desk-seat. It's a unique piece that offers a variety of function including lounging, working on a laptop, or simply sitting. It works in a range of environments – from libraries, cafes to workplace collaboration. Capacity: 100 kg

Frame injected in EPP (expanded polypropylene), covered with 3D-knitted fabric
Diam. 47.24" x h 29.33"
Seat height: 17.13"

Montado Cork Objects

by Studio Corkinho & BuloDesign

Montado Cork Objects

by Studio Corkinho & BuloDesign

The Mondado collection is developed to help organize your work environment in an enjoyable way. Both home offices and the homey office spaces will benefit from the tactile warmth, acoustic qualities and calming scents originating from the objects. The collection covers a set of organizers; flexible division screens and an online meeting assistant.

This collection was developed in collaboration with Studio Corkinho.

Studio Corkinho is a multi-disciplinary design studio from Antwerp, aiming to change people's perceptions and awareness of objects and materials that we think deserve attention because of their unique values.

The name Montado refers to the region in which cork oaks grow and are being harvested.

TECHNICAL DESCRIPTION

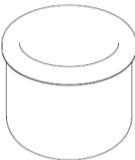

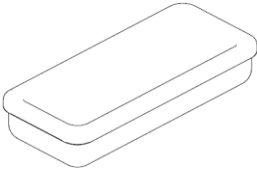

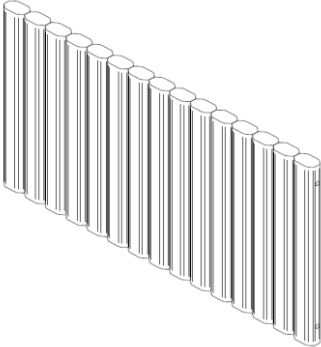

Cork is the bark of the cork oak (*Quercus Suber L.*), which means that it is a 100% natural plant tissue. The bark is harvested every nine years while the tree remains unharmed.

As a 100% natural, sustainable and highly technological material, cork gains new forms and functionalities to meet the most demanding requirements. Cork is used to create new new solutions that, through combination with different materials, guarantee the best possible performance of the final products.

The cork can be used in its natural form, burned or in combination with recycled rubber granulates and is pressed together into a block using a polyurethane binder.

Cork is 100% recyclable and the materials are tested for fire resistancy according to EN ISO 9239-1 - classification CFL - s1

General Conditions

This price list is valid as from 1st January 2025. It supersedes and replaces all previous price lists. Prices exclude taxes and shipment. Images and descriptions in all catalogues and price lists are for reference only. Variations in structure and color may occur.

Bulo may change prices and/or change specifications of products and/or take products out of collection at any time.

Codes and prices are indicated in bold in this price list as a way of showing an example how to form codes and calculate prices.

Orders are accepted definitively as soon as they are confirmed in writing. Cancellations by the client are not accepted, barring certain exceptions agreed by Bulo within 5 working days. An unpaid deposit invoice does not entitle the buyer to cancel (part of) the order.

Bulo is not responsible if delivered goods do not comply with whichever legal, technical and coordinative aspect laid down by the country or region in which the products have been installed. Whether or not goods comply to whichever local regulation is the sole responsibility of the buyer.

UPHOLSTERY

Bulo carefully selected their standard materials and fabrics. If the customer wants to use materials outside of the standard collection, Bulo reserves the right to test COM or COL before accepting the order, and if not suited as upholstery to refuse the order. In case a sample chair or sofa needs to be produced to test the suitability of the COM or COL, this will be done in consultation with and after agreement of the client prior to production. The sample chair or sofa will be charged to the client. All freight costs and customs related duty & clearance fees are the responsibility of the customer when sending COM/COL to Bulo. With the use of COM or COL, even if Bulo accepted the order, there is no guarantee on the fabric or leather, its behavior on the chair or sofa after either short or long term use, nor on pilling or creasing. Our standard guarantee applies to the upholstered parts of the product only. Bulo can not be held responsible for the fact that light colors tend to get dirty rather quickly. Leather is a precious and valuable product. No two are alike. A variety of markings like healed scars and abrasions may be visible and are not considered defects but rather add to the character of the piece, reflecting its history. All leather will stretch and form comfort creases as a result of being sat on. The effect is called puddling. Puddling occurs from the initial use period and generally does not continue beyond this, as the amount of stretch is directly related to the amount of compression. Puddling is not a fault with the leather; rather it is a good indication of quality manufacturing as large pieces of leather are used. The creases do not diminish the quality of leather upholstered furniture. It is a natural process. Climate affects fabric just as it does wood. Heat, cold, humidity and sunlight contribute to fabric instability. Jewelry, silverware, even a sharp pencil can mark the upholstery. It's important to keep sharp objects away from your furniture. External dyeing caused by products with insufficient color fastness such as jeans, cannot be avoided.

WOOD IS A NATURAL MATERIAL

We point out that wood is a natural material.

In products where veneer or solid wood is applied it is therefore possible that there is variation in color and grain within one order with multiple products in the same veneer or solid wood, or even within one product.

Our veneer samples are made from another tree than the veneer for the final product. This means that the veneer for the final product can deviate in color and design from our veneer samples.

Under the influence of light a discoloration of the original (or natural) wood colour occurs (ask Bulo or your Bulo partner for explanation and advice). Extremely important for the condition of the wood is maintaining the relative humidity as constant as possible (approx. 60%) to avoid drying, and with it shrinking of the wood.

GUARANTEE

Bulo products are under guarantee for a 10 year period for manufacturing defaults following the date of delivery.

Each Bulo product has been manufactured with exceptionally high quality materials and with the greatest possible care. The product leaves the factory only after a thorough quality control. Should in spite of our control a material- or production fault occur, Bulo will exchange or repair the product or provide the necessary replacement parts, corresponding to the delivery conditions valid at the time the delivery of the product occurred.

This guarantee is valid on the sole condition that the care and maintenance instructions were correctly applied and the product was used in regular fashion. Defaults that occur due to injudicious use are exempt from the guarantee.

Appealing to the Bulo guarantee for manufacturing defaults is possible within the guarantee period that starts from the date of delivery to the first owner or at the latest from 30 days after delivery of the goods to the Bulo dealer.

Application on the guarantee can be directed either to Bulo or to your Bulo dealer, only on presentation of the invoice. Bulo or your Bulo dealer will take care of the complaint.

Specific exclusions :

- Excessive wear and tear is not covered by the guarantee.
- Damages occurred through improper use or incorrect maintenance are exempt from the guarantee.
- Indirect damages following a possible defect, such as loss of income, etc... are not covered by the guarantee.
- Repairs on the product or upholstery executed without written consent from Bulo are exempt from the guarantee.
- The guarantee does not apply on leather and fabric upholstery, gaslifts and castors, for which a 1 year guarantee applies.
- Materials that are not part of the standard Bulo collections, used on explicit instructions of the buyer, are not covered by the guarantee, amongst them COM and COL.

- Damage caused during onwards transport or improper storage of the product or damage caused by accident are exempt from the guarantee.
 - Color variations. While every effort is made to ensure parity of color, Bulo can't guarantee an exact color match in any painted or wood finish or guarantee against commercial variance in fabrics, especially on repeat orders.
 - Natural product changes, due to aging, exposure to light and naturally occurring markings, scarring and wrinkles in leather. These are not covered by the guarantee.
 - Damage to a chair or sofa due to impact caused by the user is not covered by the guarantee.
 - Damage to property or injury caused through the use of Bulo products are not covered by the guarantee.
 - The use of an outdoor fabric does not make the chair/sofa suitable for outdoor use. Within the Bulo collections there is no furniture suited for outdoor use. Bulo furniture used outdoors is not covered by the guarantee.
 - Damage to black powdercoated horizontal surfaces or black melamine horizontal surfaces.
- For products or parts that Bulo procures with third parties Bulo applies the same guarantee as the guarantee conditions that Bulo receives from the supplier, with a minimum of 12 months.

DAMAGED GOODS

Bulo guarantees that products are in impeccable condition when leaving the warehouse in Mechelen, Belgium. Bulo guarantees an export-worthy packaging for normal transport conditions for road, sea and air freight by external forwarders. It is imperative that the condition of the packaging at receipt of the goods is photographed by the receiver and can be passed on to Bulo in case of damage to goods. Without photographs of the packaging prior to moving or unpacking, a claim about damaged goods will not be accepted. Photographs of damaged goods taken after trans-shipment, after changing our packaging or after installation only will not be accepted in a claim, unless they are accompanied by visible proof that the damage occurred prior to the trans-shipment/changing our packaging/installation.

Visible transport damage or loss MUST be noted on the carrier's CMR consignment note. This must be reported to the carrier and to Bulo in writing within 24 hours following the delivery, accompanied by photographs taken at the moment of delivery as described above and a copy of the CMR consignment note.

In case of visible transport damage, the goods need to be inspected immediately to determine whether there is damage to the goods. Damage to goods inside visibly damaged packaging needs to be reported to Bulo within 48 hours after receipt of the goods, accompanied by at least 1 detailed photograph of each damage, at least 1 photograph of the entire product and the photographs taken at the moment of delivery as described above.

Damage to goods inside undamaged packaging needs to be reported to Bulo within 7 calendar days after receipt of the goods, accompanied by a photograph of taking the damaged part out of the packaging, at least 1 detailed photograph of each damage, 1 photograph of the entire product and photographs taken at the moment of delivery as described above.

RETURN OF GOODS

Returned goods are not accepted unless the sender has received written consent and despatch instructions from Bulo.

DELIVERY CONDITIONS OUTSIDE BELGIUM

The prices in the price list are ex-works.

Bulo can organize the shipment for you. Please contact us for additional information and/or a shipment quotation.

For delivery by Bulo to a warehouse, the client will provide a warehouse address that complies with the following conditions: easy access route and ample parking space for a truck with a 44' long trailer. The truck will be without tailgate lift unless otherwise agreed by Bulo beforehand. A forklift truck has to be on site, as well as personnel to offload and take the goods inside. Installation and waste disposal not included. Delivery during regular working hours only.

Delivery to an address without warehouse facilities, always in consultation with Bulo, subject to an upcharge.

Delivery dock-to-dock.

Installation at site by the buyer.

When delivery ex-works, the liability for the goods is transferred from Bulo to the buyer from the moment the goods have left Bulo's warehouse. We advise ex-works customers to insure products during transport.

PCON/Revit

In case of a price difference between pCon and this price list, it's the price in this price list that is valid and that will be charged.

In case of a finish anomaly between pCon/Revit and this price list, it's only the products and their finishes as described in this price list that are available. It is possible that a finish, dimension or entire product featured in pCon/Revit can not be purchased anymore.
